SUMMARY

New grad software engineer with **over 2 years of professional experience** across enterprise co-ops and academic research. A proactive team collaborator with a proven ability to integrate into **Agile** workflows. Skilled at communicating alongside cross-functional teams to align priorities and ship reliable software.

TECHNICAL SKILLS

Languages: Java, C#, Python, SQL, JavaScript, Typescript, HTML, CSS, C

Frameworks: React, Spring Boot, Next.js, Node.js, Express, Nest, Selenium, Flask

Tools: Git, Postman, Android Studio, Docker, Jenkins, Firebase, Redis, Unity, Jira

WORK EXPERIENCE

Software Engineer | KPM Power Inc.

May 2025 – Aug 2025

- Built an assembly navigator to migrate data retrieval from a high-latency third-party software to an internal service, reducing average component lookup time from **~30s to under 1s**
- Engineered a real-time monitoring system for **30** production-line kiosks using **Node.js, Express**, and **Socket.io**, enabling **instant fault detection** and remote status updates
- **Eliminated session data loss** on production-line kiosks by migrating volatile client-side timers to the back-end and leveraging **Datadog** for real-time system observability

Back-End Developer | Ministry of Children, Community and Social Services

May 2024 – Aug 2024

- Developed **RESTful** services with **Java** and **Spring Boot** to enable reliable handling of newborn screening data, supporting **52** public health agencies across Ontario
- Integrated **Docker** into **Jenkins CI/CD** pipelines to containerize the front-end and back-end, yielding a **75% average reduction** in deployment overhead by mitigating environment-related roadblocks
- Optimized upstream database load by **80%** and secured a **sub-250ms p95 latency** by integrating **Redis** with **Spring Cache** abstraction

QA Automation Developer | Ministry of Children, Community and Social Services

Sep 2023 – Apr 2024

- Developed a test automation codebase using **Java** and **Selenium**, achieving **83% coverage** of the regression suite and reducing average regression testing time by **3 business days**
- Automated **100%** of test data preparation workflows by creating a suite of **MS SQL Server** stored procedures and generated spreadsheets with **ApachePOI**, **eliminating a full day** of manual verification every release cycle

EDUCATION

Computer Science, Honours B.Sc. | York University

Sep 2021 – Jun 2026

- **GPA:** 3.7/4.0, First-Class Honours

FEATURED PROJECT

Synapse (TD Bank Capstone) | TypeScript, Python, Next.js, Nest, FastAPI, MongoDB, Gemini API, Auth0

- Contributed to an **interdisciplinary team of 7** to develop an **AI-driven** compliance auditor, achieving a **25% reduction** in policy deviance risk scores, validated through a **50-participant** research study
- Developed a full-stack policy manager for TD's compliance team, leading to **40% faster** average completion time of common maintenance tasks (record access, amendments, revision changelogs) and **82% preference** over legacy workflows
